Compostable Products

Biodegradable plastic bags **decompose naturally within 6–24 months** in landfill or composting conditions. They **maintain strength and water resistance** during use, and leave no microplastics after breaking down — making them a **smart, sustainable choice** for both the environment and human health.

Why choose us?

01

Cost-Effective Pricing

With our OEM model, we are committed to providing you with the most competitive pricing.

02
